| <b>A. Lucia and J. Xu</b>   | 119 | Chemical process optimization using Newton-like methods                                  |
| <b>M. M. L. Guimarães, P. F. R. Regueiras and J. J. C. Cruz-Pinto</b> | 139 | Mass transfer and dispersed phase mixing in liquid-liquid systems—II                     |
| <b>H. S. Khashgi</b>  | 149 | Transient reactor analysis by approximate Jacobian factorization                         |
| <b>H. Mehdizadeh and J. M. Dickson</b>                                | 157 | Solving nonlinear differential equations of membrane transport by orthogonal collocation |

<b>J. C. Fagley and B. Carnahan</b>	161	The sequential-clustered method for dynamic chemical plant simulation
<b>H. A. Preisig and R. E. White</b>	179	On the design of a simple solver for nonlinear two-point boundary value problems
<b>J. Cerdá, M. R. Galli, N. Camussi and M. A. Isla</b>	197	Synthesis of flexible heat exchanger networks—I. Convex networks
<b>J. Cerdá and M. R. Galli</b>	213	Synthesis of flexible heat exchanger networks—II. Nonconvex networks with large temperature variations
<b>R. E. Carmola and E. H. Chimowitz</b>	227	Analysis of modal reduction techniques for the dynamics of general tridiagonal systems

### NUMBER 3

<b>G. V. Reklaitis</b>	i	Announcement—Best Paper of 1988
<b>A. R. Ciric and C. A. Floudas</b>	241	Application of the simultaneous match-network optimization approach to the pseudo-pinch problem
<b>S. A. Mendoza-Bustos, A. Penlidis and W. R. Cluett</b>	251	Robust adaptive process control of a polymerization reactor
<b>D. Singer</b>	259	Fault tree analysis based on fuzzy logic
<b>S. S. Ashour and O. T. Hanna</b>	267	A new very simple explicit method for the integration of mildly stiff ordinary differential equations
<b>O. T. Hanna</b>	273	The use of integral global extrapolation in the numerical solution of ordinary differential equations
<b>E. C. Yamalidou, E. P. Patsidou and J. C. Kantor</b>	281	Modeling discrete-event dynamical systems for chemical process control—a survey of several new techniques
<b>R. Lakshmanan and G. Stephanopoulos</b>	301	Synthesis of operating procedures for complete chemical plants—III. Planning in the presence of qualitative, mixing constraints
<b>S. G. Hall, S. Ahmad and R. Smith</b>	319	Capital cost targets for heat exchanger networks comprising mixed materials of construction, pressure ratings and exchanger types
<b>J. Leonard and M. A. Kramer</b>	337	Improvement of the backpropagation algorithm for training neural networks
	I	Softstrip® data strip containing the table of contents of this issue

## NEW TRENDS IN PROCESS CONTROL

Y. Arkun

v Preface

*Robust Process Control*

- P. J. Campo and M. Morari 343 Robust control of processes subject to saturation nonlinearities
- E. Zafiriou 359 Robust model predictive control of processes with hard constraints
- H. Rotstein, J. Bandoni, A. Desages and J. Romagnoli 373 Mathematical programming with linear uncertain constraints—application to robust control
- V. Manousiouthakis 381 A game theoretic approach to robust controller synthesis
- T. Khambanonda and A. Palazoglu 391 Robustness studies for multivariable feedback systems using refined eigenvalue inclusion regions (REIR)
- S. Skogestad and P. Lundström 401 Mu-optimal *LV*-control of distillation columns

*Nonlinear Control*

- J.-P. Calvet and Y. Arkun 415 Design of P and PI stabilizing controllers for quasi-linear systems
- L. C. Limqueco and J. C. Kantor 427 Nonlinear output feedback control of an exothermic reactor
- C. Kravaris and P. Daoutidis 439 Nonlinear state feedback control of second-order nonminimum-phase nonlinear systems
- W. C. Li, L. T. Biegler, C. G. Economou and M. Morari 451 A constrained pseudo-Newton control strategy for nonlinear systems
- J. W. Eaton and J. B. Rawlings 469 Feedback control of chemical processes using on-line optimization techniques
- P. M. Hidalgo and C. B. Brosilow 481 Nonlinear model predictive control of styrene polymerization at unstable operating points

*Learning and AI Systems*

- J. T.-Y. Cheung and G. Stephanopoulos 495 Representation of process trends—Part I. A formal representation framework
- J. T.-Y. Cheung and G. Stephanopoulos 511 Representation of process trends—Part II. The problem of scale and qualitative scaling

<b>D. J. Cooper and A. M. Lalonde</b>	541	Process behavior diagnostics and adaptive process control
<b>M. R. Basila Jr, G. Stefanek and A. Cinar</b>	551	A model-object based supervisory expert system for fault tolerant chemical reactor control
<b>L. H. Ungar, B. A. Powell and S. N. Kamens</b>	561	Adaptive networks for fault diagnosis and process control
<b>N. Bhat and T. J. McAvoy</b>	573	Use of neural nets for dynamic modeling and control of chemical process systems
<b>B. E. Ydstie</b>	583	Forecasting and control using adaptive connectionist networks

	i	Softstrip® data strip containing the table of contents of this issue
--	---	--

## NUMBER 6

	i	Softstrip® data strip containing the table of contents of this issue
--	---	--

<b>K. K. Trivedi, B. K. O'Neill, J. R. Roach and R. M. Wood</b>	601	Systematic energy relaxation in MER heat exchanger networks
<b>Gh. Juncu</b>	613	Multigrid solution for the catalytic chemical reactor model
<b>M. Shacham</b>	621	A variable order method for solution of a nonlinear algebraic equation
<b>A. Aggarwal and C. A. Floudas</b>	631	Synthesis of general distillation sequences—non-sharp separations
<b>M. A. Malachowski, R. E. Stephenson, J. P. Oppenheim and R. J. Steffensen</b>	655	Vectorization of fluid property calculations within a petroleum reservoir simulator
<b>A. W. Alsop and T. F. Edgar</b>	665	Nonlinear control of a high-purity distillation column by the use of partially linearized control variables
<b>J. C. Wu, L. T. Fan and L. E. Erickson</b>	679	Three-point backward finite-difference method for solving a system of mixed hyperbolic-parabolic partial differential equations
<i>Short Notes</i> <b>P. Grosdidier</b>	687	Analysis of interaction direction with the singular value decomposition
<b>A. M. Helal and S. S. Elnashaie</b>	691	Numerical construction of bifurcation diagrams for non-linear complex reaction networks in catalytic reactors

## NUMBER 7

- i Softstrip® data strip containing the table of contents of this issue

V. Venkatasubramanian, R. Vaidyanathan and Y. Yamamoto	699	Process fault detection and diagnosis using neural networks—I. Steady-state processes
G. J. Birky and T. J. McAvoy	713	A general framework for creating expert systems for control system design
B. Linnhoff and S. Ahmad	729	Cost optimum heat exchanger networks—1. Minimum energy and capital using simple models for capital cost
S. Ahmad, B. Linnhoff and R. Smith	751	Cost optimum heat exchanger networks—2. Targets and design for detailed capital cost models
J. Viswanathan and I. E. Grossmann	769	A combined penalty function and outer-approximation method for MINLP optimization
S. D. Grantham and L. H. Ungar	783	A first principles approach to automated troubleshooting of chemical plants
Ph. de Vallière and D. Bonvin	799	Application of estimation techniques to batch reactors—III. Modelling refinements which improve the quality of state and parameter estimation
A. A. Humffray	809	Variations on the algorithm of Theliander and Grén for estimating the densities of mixed electrolyte solutions

## NUMBER 8

- i Softstrip® data strip containing the table of contents of this issue

G. Stephanopoulos, G. Henning and H. Leone	813	MODEL.LA. A modeling language for process engineering—I. The formal framework
G. Stephanopoulos, G. Henning and H. Leone	847	MODEL.LA. A modeling language for process engineering—II. Multifaceted modeling of processing systems
M. Rovaglio, E. Ranzi, G. Biardi and T. Faravelli	871	Rigorous DYnamics and COntrol of continuous Distillation Systems—simulation and experimental results
W. L. Rion and V. Van Brunt	889	Differential geometry based homotopy continuation
L. N. Sridhar and A. Lucia	901	Tearing algorithms for separation process simulation

- S. Vasantharajan,**  
**J. Viswanathan and**  
**L. T. Biegler** 907 Reduced successive quadratic programming implementation for large-scale optimization problems with smaller degrees of freedom

*Short Notes*

- B. Jayadeva, Y. S. N. M. Rao,** 917 Nonlinear controller for a pH process  
**M. Chidambaram and**  
**K. P. Madhavan**

- M. C. Kimble and R. E. White** 921 A five-point finite difference method for solving parabolic partial differential equations

I Corrigendum

**NUMBER 9**

- i Softstrip® data strip containing the table of contents of this issue

- T. Gundersen and** 925 Improved optimization strategies for automated  
**I. E. Grossmann** heat exchanger network synthesis through physical insights

- C. C. Lakshmanan** 945 Cinematic modelling of dynamics of countercurrent  
**and O. E. Potter** systems

- V. G. Doví and O. Paladino** 957 Use of fuzzy optimization algorithms for the solution of a class of ill-posed problems in data analysis

- D. A. Straub and** 967 Integrated stochastic metric of flexibility for sys-  
**I. E. Grossmann** tems with discrete state and continuous parameter uncertainties

- G. L. Jones** 987 Semi-implicit method for the solution of systems of stiff ordinary differential and differential-algebraic equations

- E. N. Pistikopoulos** 991 A novel flexibility analysis approach for processes  
**and T. A. Mazzuchi** with stochastic parameters

- A. Skoczylas and J. Dziak** 1001 Separation efficiency of thin-layer evaporators

- J. F. Pekny, D. L. Miller and** 1009 An exact parallel algorithm for scheduling when  
**G. J. McRae** production costs depend on consecutive system states

- N. Brauner and R. Lavie** 1025 Feedforward quality control through inventory manipulation in periodically perturbed mixed accumulators

- E. Tsotsas and** 1031 Numerical calculation of the thermal conductivity of  
**E.-U. Schluender** two regular bidispersed beds of spherical particles
